

## Statistics of Licensing under Export Control Reform

October 15, 2013 to September 30, 2016

The license applications for items in the 15 categories of the United States Munitions List (USML) showed an overall average decline of 57.2 % from 4,156 to 1,777 per month through September 30, 2016. The average monthly drop of 2,379 in license applications is the result of certain items that do not warrant control on the USML transitioning to the Commerce Control List (CCL) under President Obama’s Export Control Reform (ECR) initiative. The biggest drop in license applications was those impacted by the Fourth ECR Transition Rule for satellites with a 81.4% decline. The Directorate of Defense Trade Controls (DDTC) of the U.S. Department of State estimates a 45% decline in license applications will be shown when all USML categories have been reviewed.
